Objective

Looking for a software engineering position where I can work on products, be part of a team, and be creative. I am passionate about using technology to make people's lives better, and connecting with those people to see how technology has made their lives better.

Education

Montana State University
Expected Graduation: Spring 2020 | Bozeman, MT
Computer Science major with Philosophy minor.

Special Skills

- Friendly and outgoing
- Team leader in groups
- Can develop, shoot, and produce video for instruction or entertainment
- Positive mental attitude always
- Experienced in Desktop Publishing
- Excellent public speaker
- Skilled with computer programing in Java, Python, C, HTML, jQuery, SCSS and more

Work Experience

Learning and Development Internship — City Brew Coffee
October 2015 - Present | Billings, MT & Bozeman, MT

- Developed an online education program that revolutionized training in the company
- Worked remote in a different city, which forced great communication
- Completed tasks assigned to me on time with high quality result

Software Engineering Internship — Foundant Technologies
September 2017 - Present | Bozeman, MT

- Part of a development team that maintained and improved a number of web-based products
- Focused in quality assurance; devised tests and wrote code to stress test the products, as well as handling bugs sent from the client services team

Campus Minister — Resurrection University Catholic Parish
January 2017 - September 2017 | Bozeman, MT

- Managed weekly groups for teaching, recruitment, and spiritual growth
- Collaborated with other campus ministers to develop long term strategies
- Created new and consistent marketing and branding strategy for our group
